## PERSONAL PROJECTS

---

### thang-nguyen.ca

Dec 2022 -Present

- Developed a website using React, HTML, CSS, and TypeScript, implementing useState and useEffect hooks to manage sections within the navbar and a theme toggler for light/dark mode.
- Utilized array map method to render dynamic data lists on the website efficiently.
- Implemented CSS media queries for a responsive design that adapts to various screen sizes.
- Constructed website structure and layout using functional components in JSX files for easy management and updates to the user interface.

### reactnote-thang.vercel.app

Feb 2023 – Present

- Built a note application with a clean and intuitive interface using Tailwind CSS framework and React Router DOM.
- Implemented search functionality within the note to allow for faster search of Titles based on keywords.
- Utilized array map and filter method for quickly rendering data list and UUID for unique ID on each note.

## EDUCATION

---

### Toronto Metropolitan University (Formerly Ryerson University)

Sep 2022 -Present

BS, Computer Science

Toronto, ON

- Relevant coursework: Computer Science I and II, Computer Organization I and II.
- Current Term GPA: 3.75

## WORK EXPERIENCE

---

### Kraken Digital Asset Exchange (Remote Work)

March 2022 – Dec 2022

Client Engagement Specialist

San Francisco, CA

- Engaged with more than 50 clients daily to assist with account creation, position open for trading, account access, deposit and withdrawal of cash and cryptocurrency, payment error and server status.
- Reviewed client's ongoing ticket on Zendesk and escalated to the relevant department while documenting issues and updating that client while ensuring the matters were being expedited and resolved.
- Identified real-time bugs that clients were facing and problems clients had using internal resources to provide fast, accurate responses and achieve an excellent resolving time of around 10 minutes or less.

### New Era Tool and Die Limited

Aug 2019 – March 2022

CNC Machinist

North York, ON

- Interpreted engineer drawing with high accuracy to produce parts within tolerances for nuclear and industrial sectors.
- Set up, programmed and operated CNC machines efficiently to meet targets and increase profit for the company.
- Maintained high-accuracy inspection records to avoid more than 5 NCR for the company per month.
